POSTMATIC Inline Stamping Bases

High Speed, High Production Stamp Affixing Bases

POSTMATIC Inline Stamping Base - Extended

POSTMATIC Inline Stamping Base

POSTMATIC

Inline Stamping Bases
that Minimize Handling
and Maximize Profits.

All Postmatic Inline Stamping Bases are manufactured using high quality materials, sealed ball-bearings, and precision electronic control provides years of trouble free use. For over 30 years, Postmatic has set the industry standard for stamp affixing equipment technology and has raised the bar again with our family of Inline Stamping Bases.

The Postmatic Inline Stamping Base – *Standard* is designed with the identical foot print as the Pitney Bowes® R-150 and Hasler® inline mailing machines. Drops right in place with no modifications or alterations. Features include Vacuum Belt Transport Technology and Precision Gear Drive Electronics for fast and accurate stamp affixing. A fully self contained unit with a high volume blower maintains continuous control of the mail piece and quality DC Drive provides fixed transport speeds of 240 or 330 feet per minute. With stamp affixing cycling speeds in excess of 18,000 per hour, it can be used inline with almost any inserter, inkjet, labeler or tabber. Used with a feeder makes this unit an affordable, high speed alternative to using tabbers for off-line stamp affixing. Designed to accommodate either the Postmatic Model 6000SA or Model 7000SA stamp affixing attachments.

The Postmatic Inline Stamping Base – *Extended* offers the versatility of attaching an inkjet system, labeler or other peripheral equipment. The extended base is the perfect solution for inline read and print systems used on inserting equipment allowing you to stamp and print with one system in one pass.
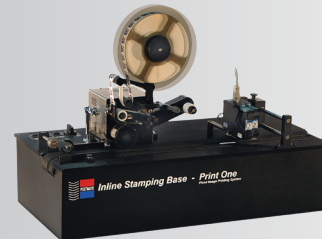

The Inline Stamping Base w/*Print One* is the complete package to affixing stamps and printing "Mailers' Precancelled Permit", just affixing stamps or just static printing all in a single pass. The extended base has our *Print One* Fixed Image Printing System and is a very cost effective solution for static printing fixed images or text. Using standard HP 45 inkjet cartridges, printing is easier and more affordable than ever. Simply down load your image or text from your PC or laptop to the 1" print head and you're ready to print.
