Print One Fixed Image Printing System

POSTMATIC

Inline Printing Solutions
that Minimize Handling
and Maximize Profits.

The Postmatic *Print One* uses standard HP 45 inkjet cartridges and thermal inkjet technology making static printing easier and more affordable than ever. Simply download your image or text from your PC or laptop to the print head and you're ready to print over and over again. No print driver or PC integration required!
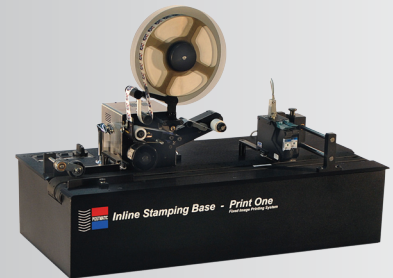

The Postmatic *Print One - Standard* is a very cost effective solution for static printing of text messages, return addresses, dates, bulk rate permits, "Mailers' Precancelled Permits", indicias, logos, barcodes and more. Designed with the identical foot print as the Pitney Bowes® R-150 and Hasler® inline mailing machines, this high volume vacuum transport base with a 1" print head enables printing inline with high speed inserters, inkjet systems, tabbers and other mail preparation equipment. Fully self contained with a high volume blower maintains continuous control of the mail piece and quality DC Drive provides variable speeds to 400 feet per minute.

Print One – Standard

The Inline Stamping Base w/*Print One* is the complete package to affixing stamps and printing "Mailers' Precancelled Permit", just affixing stamps or just static printing all in a single pass. The extended base has our *Print One* Fixed Image Printing System and is a very cost effective solution for static printing fixed images or text. Using standard HP 45 inkjet cartridges, printing is easier and more affordable than ever. Simply down load your image or text from your PC or laptop to the 1" print head and you're ready to print.

Inline Stamping Base w/*Print One*

The Postmatic *Print One* **Fixed Image Printing Kit** is a fully self contained, completely portable static printing system capable of attaching to almost any vacuum transport base and allows an extra 1" of static printing. The kit includes a 1" HP Print Head, Trigger Sensor and Encoder mounted to a 24" wide Bridge Assembly and its own electrical enclosure housing the required power supply.
